Regulatory Improvements for Production and Utilization Facilities

Transitioning to Decommissioning: Correction

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed rule; correction.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is correcting a proposed rule that was published in the *Federal Register* on March 3, 2022. The proposed rule would amend the NRC's regulations that relate to the decommissioning of production and utilization facilities to maintain a safe, effective, and efficient decommissioning process; reduce the need for license amendment requests and exemptions from existing regulations; address other decommissioning issues deemed relevant by the NRC; and support the NRC's Principles of Good Regulation. This action is necessary to correct a reference.

DATES: The correction takes effect on **[INSERT DATE OF PUBLICATION IN THE FEDERAL REGISTER**].

Correction

In the *Federal Register* (FR) on March 3, 2022, in proposed rule FR Doc. 2022-03131, the following corrections are made:

- 1. On page 12301, under "O. Removal of License Conditions and Withdrawal of Orders," in the center column, beginning with the first full sentence through the end of the paragraph, the text is corrected to read, "The Mitigation of Beyond-Design-Basis Events rule subsequently moved § 50.54(hh)(2) to § 50.155(b)(2). As a result, neither Order EA–06–137 nor the license condition is necessary. Accordingly, the NRC proposes finding that good cause is shown to rescind Order EA–06–137 for each licensee that received the order. In addition, because § 50.155(b)(2) provides the same requirements as the license condition associated with Order EA–06–0137, the NRC proposes deeming the license condition removed from each applicable nuclear power reactor license."
- 2. On page 12301, under "O. Removal of License Conditions and Withdrawal of Orders," in the center column, beginning with the last sentence through the third column, end of the first paragraph, the text is corrected to read, "Because licensees

comply with both the regulations and Mitigation Strategy License Condition via the same guidance, such that the former § 50.54(hh)(2) requirements encompass the license condition requirements, the NRC proposes concluding that § 50.155(b)(2) fully replaces the requirements that exist in the Mitigation Strategy License Condition and deeming that the Mitigation Strategy License Conditions imposed in 2007 are removed from the licenses for those licensees that received that license condition."
